

Luke Edwards | Data Scientist

Columbia, MO • (661) 904-1027 • luke3dwards32@gmail.com • [linkedin.com/in/luke-edwards-ds/](https://www.linkedin.com/in/luke-edwards-ds/)

Portfolio: <https://ledwards-analytics.github.io/> | Github: <https://github.com/LEdwards-Analytics>

Data Scientist with 4+ years of experience delivering machine learning, statistical modeling, and business intelligence solutions across financial services and operations. Proficient in Python, SQL, Snowflake, and Databricks, with proven work in predictive modeling, lead scoring, and AI-assisted automation. Partners with product and operations teams to convert complex data into clear insights and reusable tools. Master's in Economics with a strong foundation in experimentation and end-to-end problem solving.

PROFESSIONAL EXPERIENCE

Veterans United Home Loans

Columbia, MO

Data Scientist

Jan 2026 - Present

- Built diagnostic Tableau dashboards for the company's highest-volume product, replacing ad-hoc SQL triage and enabling managers and directors across **1,000+** employees to self-serve activity investigations spanning millions of lead-level records.
- Designed score-based Hot, Warm, and Cold routing tiers for **500,000+** leads by operationalizing an existing ML model in Python and Snowflake, surfacing a top segment covering **14%** of leads that delivered a **1.7x** close-rate lift.
- Trained a decision tree to extract interpretable routing rules from the model, giving operations teams transparent criteria in place of opaque scores.
- Partnered with product and operations teams to define and analyze borrower KPIs, identifying the key drivers of engagement and loan conversion.
- Designed AI-assisted workflows and reusable Python tools that automate recurring analyses, accelerating and standardizing delivery across product and ops stakeholders.

CIBT

Remote

Data Scientist

May 2025 - Sep 2025

- Built an explainable machine learning model with SHAP to attribute NRPU fluctuations across products and regions, reducing manual variance analysis by roughly **90%**.
- Developed GPT-powered automation for lead sourcing that cut manual supplier research time by roughly **70%** for the marketing team.
- Automated a commission-tracking pipeline with Power BI reporting logic, reducing validation time from days to minutes.

Independent Consulting

Remote

Data Scientist

Aug 2024 - Jan 2025

- Engineered Python data pipelines integrating social media APIs to automate collection and cleaning of engagement metrics, replacing manual data pulls for a media client.
- Delivered ongoing performance reporting and analysis that gave the client continuous visibility into content engagement trends.

CIBT

Remote

Senior Business Intelligence Analyst

Jul 2023 - Apr 2024

- Led the enterprise-wide KPI standardization initiative, consolidating metrics in SQL and Power BI to eliminate **60%** of redundant measures and establish a single authoritative reporting framework.
- Optimized SQL queries and reporting pipelines that were slowing delivery, reducing runtime by **43%** and saving **8+** hours per week.
- Designed and delivered executive Power BI dashboards that gave leadership real-time visibility into business-critical KPIs.
- Architected DAX logic with data engineers and integrated Snowflake pipelines into the BI layer, streamlining report generation and reducing data latency for end users.

Interface Financial Group

Bethesda, MD

Senior Financial Analyst

Jun 2022 - May 2023

- Automated client financial analysis workflows in Python, reducing processing time by **93%** and reclaiming **20+** hours per month.
- Conducted credit risk and investment evaluations for small business clients, supporting high-value funding decisions.
- Served as the primary analytical contact for executives, fielding financial questions and delivering findings that enabled timely decisions.

NOTABLE PROJECTS

AI-Powered Earnings Sentiment Analysis & Investment Research Platform (Python)

- Built NLP pipeline (GPT-4 + ML) linking earnings call sentiment to subsequent stock performance; developed a conversational query interface for extracting insights across filings

NBA Win Prediction

- Scraped and compiled 40 years of NBA team data, then built a multivariate regression model in Stata to estimate seasonal wins, applying VIF testing, heteroskedasticity checks, and iterative variable selection to produce a statistically rigorous final model

Counter-Strike Match Outcome Predictor (Python)

- Developed ML model predicting esports match outcomes using team performance metrics and map history; simulated best-of-three series to estimate win probabilities

EDUCATION

Boise State University | Boise, ID

Master of Economics

University of La Verne | La Verne, CA

Bachelor of Science in Economics

CERTIFICATIONS & ACTIVITIES

- Google Advanced Data Analytics Professional Certificate.
- Collegiate Esports Team Captain, Boise State University.
- NCAA Collegiate Basketball Player, University of La Verne.

TECHNICAL SKILLS / INTERESTS

- **Languages & Tools:** Python, SQL, Git/GitHub, Databricks, Snowflake, Claude Code
- **Machine Learning:** scikit-learn, XGBoost, LightGBM, SHAP
- **Data Engineering & Cloud:** ETL Pipelines, DAX
- **Visualization & Statistics:** Power BI, Tableau, Matplotlib, Hypothesis Testing, Experimental Analysis, Regression Analysis
