

Luke Edwards

Data Scientist

(661) 904-1027 • luke3dwards32@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Summary

Data Scientist with nearly 3 years of experience delivering ML models, AI-powered tools, and automation that improve decision-making speed by up to 93%. Master's in Economics with strong training in forecasting, statistics, and analytics. Proven ability to build ML models, automate workflows saving 20+ hrs/month, design dashboards, and deploy LLM-based solutions.

Skills

Programming & Data Tools: Python, SQL, Git/GitHub, Databricks, Snowflake

Machine Learning & AI: scikit-learn, XGBoost, LightGBM, TensorFlow, PyTorch, NLP/Generative AI, Time Series Forecasting

Data Engineering & Cloud: ETL Pipelines, SQL Optimization, AWS, Azure

Visualization & Statistics: Power BI, Tableau, Matplotlib, Regression, Hypothesis Testing, A/B Testing

Professional Experience

Data Scientist – CIBT (Remote, Contract)

May 2025 – Sep 2025

- Built a Python ML model with SHAP to explain and forecast NRPU fluctuations, eliminating 8 hrs/week of manual variance analysis
- Developed and optimized prompt-based automation with ChatGPT, reducing manual lead research by 70% and accelerating prospecting
- Engineered automated commission-tracking pipeline with Power BI logic, cut payout validation time from days to minutes, removing 80% of manual calculations
- Delivered weekly performance insights to leadership, translating complex data into clear, actionable trends that accelerated decision-making

Data Scientist – Independent Consulting (Remote)

Aug 2024 – Jan 2025

- Built Python pipelines with social media APIs to collect and clean engagement metrics across posts
- Automated visualizations (Matplotlib/Pandas) to track audience engagement trends
- Delivered social media engagement analysis for a freelance client in the media/entertainment space

Senior Business Intelligence Analyst – CIBT (Remote)

Jul 2023 – Apr 2024

- Standardized enterprise-wide reporting, reducing redundant metrics by 60%
- Built KPI-driven Power BI dashboards, providing executives with real-time performance views
- Optimized SQL queries and processes to cut reporting pipelines by 43% (8+ hrs saved per week)
- Partnered with data engineers to design DAX logic and integrate Snowflake pipelines, improving accuracy and scalability

Senior Financial Analyst – Interface Financial Group (Bethesda, MD)

Jun 2022 – May 2023

- Automated client analysis with Python, reducing processing time by 93% (20+ hours saved per month)
- Conducted credit risk and investment evaluations for small business clients, supporting funding decisions
- Served as the primary contact for executives, addressing financial questions and ensuring clear communication

Projects

AI-Powered Earnings Sentiment Analysis & Investment Research Platform (Python)

- Built NLP pipeline (GPT-4 + ML) linking earnings sentiment to stock performance and developed a conversational AI interface for querying insights

Counter-Strike Match Outcome Predictor (Python)

- Developed a ML model to predict esports match outcomes using team performance metrics and map history, simulating best-of-three series for win probabilities

Education

Master of Economics – Boise State University

2020 – 2022

Bachelor of Science in Economics – University of La Verne

2016 – 2019

Certifications & Activities

Advanced Data Analytics Professional Certificate – Google

2024

Collegiate Esports Team Captain – Boise State University

2020-2022

NCAA Collegiate Basketball Player – University of La Verne

2016-2019
